DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the title does not match the amended title in the application. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not). There are two claims numbered 20. The misnumbered claims have been renumbered 21-23.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory

Art Unit: 3738

obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

4. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

5. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 16-23 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. **6,168,621**

Art Unit: 3738

(Vrba) in view of Patent **6,740,113** (Vrba). Patent '621 discloses a stent with a trunk and at least two joined cylindrical parts extending from the trunk (which equates to the term bifurcated stent in the current application) wherein one part is capable of radially self expanding and the other part is radially expandable only by means of a force applied thereto. However the claims of '621 do not specify the use of a catheter in the claims. Patent '113 claims the use of catheter with a stent disposed about the balloon and wherein a portion of the stent is self expandable and a portion of the stent is balloon expandable. It would have been obvious to one having ordinary skill in the art at the time the invention was made to take the device in patent '621 and deploy it with a catheter as claimed in patent '113 because most stents that are not self expandable (both regular and bifurcated) are expanded with the aid of a balloon attached to a stent and patent '621 does indeed claim that a trunk is balloon expandable.
